

## User Acceptance Tests for Frontend

Below are a set of test cases used to test the Views of the application and that the requirements for the application have been met.

| Test Case ID | Given                                                                                             | When                                                                                                               | Then                                                                                                                     |
|--------------|---------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|
| 1            | The user has followed the setup and installation instructions in the application's documentation. | The user runs the main application.                                                                                | The application will start displaying the Home Page first.                                                               |
| 2            | The user has followed the setup and installation instructions in the application's documentation. | The main application has just started.                                                                             | Display the Home Page which shows 3 buttons in the middle of the page: "Merchandise", "Purchase", "Sales Breakdown"      |
| 3            | The Home Page is displayed.                                                                       | The user clicks the "Merchandise" Button.                                                                          | Display the Merchandise Page.                                                                                            |
| 4            | The Home Page is displayed.                                                                       | The user clicks the "Purchase" Button.                                                                             | Display the Purchase page.                                                                                               |
| 5            | The Home Page is displayed.                                                                       | The user clicks the "Sales Breakdown" Button.                                                                      | Display the Sales Breakdown page.                                                                                        |
| 6            | The Merchandise page is displayed.                                                                | The user clicks a record in the table and presses the "Select Record" button.                                      | The selected record's fields are populated in the entry buttons below the table.                                         |
| 7            | The user has selected a record and it has been populated in the entry fields.                     | The user clicks one of the entry buttons with it populated with the relevant column data from the selected record. | The user is able to edit the text in that box.                                                                           |
| 8            | The user has edited an entry box for a selected record.                                           | The user clicks the "Update Record" button.                                                                        | That record, if the data entered is valid, is updated and the updated record will be shown in the table.                 |
| 9            | The user has selected a record and is populated in the entry boxes.                               | The user clicks the "Remove Record" button.                                                                        | The record will be deleted and no longer displayed in the table.                                                         |
| 10           | The user has added the details for a new item to be added to the system in the entry boxes.       | The user clicks the "Add Record" button.                                                                           | The record will be added to the Merchandise table, and the new record will be displayed as the last record in the table. |
| 11           | The user has selected a record, and the details have                                              | The user clicks the "Refresh" button.                                                                              | The entry buttons are cleared and any data in                                                                            |

|    |                                                                                       |                                                              |                                                                                                                                                                                                     |
|----|---------------------------------------------------------------------------------------|--------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|    | been populated in the entry boxes.                                                    |                                                              | the table which hasn't been updated is updated.                                                                                                                                                     |
| 12 | The user is on the Merchandise page.                                                  | The user clicks the "Back to Home Page" button.              | The Home Page is displayed.                                                                                                                                                                         |
| 13 | The Purchase page is being displayed.                                                 | The user selects the drop-down button for Product Types.     | The current products that have available stock to be purchased is displayed, so they can be selected.                                                                                               |
| 14 | The user has selected a product type and it has populated the product type entry box. | The user clicks the drop-down button for Quantity.           | The quantities available to be purchased for the selected product type are displayed so the user can select their quantity to purchase.                                                             |
| 15 | The user has selected their product type and quantity to purchase.                    | The user has just entered the quantity to purchase.          | The Price and Date entry boxes are automatically populated with the total price of the purchase and the date the purchase was made.                                                                 |
| 16 | The user has entered all details in the entry boxes on the Purchase Page.             | The user clicks the "Create Purchase" button.                | The purchase is created and can be seen in the table.                                                                                                                                               |
| 17 | The user has created purchases on the purchase page.                                  | The user has selected the drop-down button for Purchase IDs. | The purchase IDs are displayed in a list, for the user to select.                                                                                                                                   |
| 18 | The Purchase ID has been selected by the user and populated in the entry button.      | The user selects the "Cancel Purchase" button.               | The purchase with that ID is deleted and removed from the table displaying all purchases.                                                                                                           |
| 19 | The user is on the Purchase Page.                                                     | The user clicks the "Back to Home Page" button.              | The Home Page is displayed.                                                                                                                                                                         |
| 20 | The user is on the Sales Breakdown Page                                               | The user clicks the "Refresh" button.                        | The information about the sales per product and the amount to be paid to the band and phoenix are updated and displayed. The total to be paid to the band is updated and displayed below the table. |
| 21 | The user is on the Sales Breakdown Page.                                              | The user clicks the "Clear DB and close application" button. | The Merchandise and Purchase tables are dropped from the database and the tkinter application closes.                                                                                               |
| 22 | The user is on the sales breakdown page.                                              | The user clicks the "Back to Home Page" button.              | The Home Page is displayed.                                                                                                                                                                         |
| 23 |                                                                                       |                                                              |                                                                                                                                                                                                     |
